## Laporan Tugas Praktikum Pemrograman Berorientasi Objek

### Modul 7

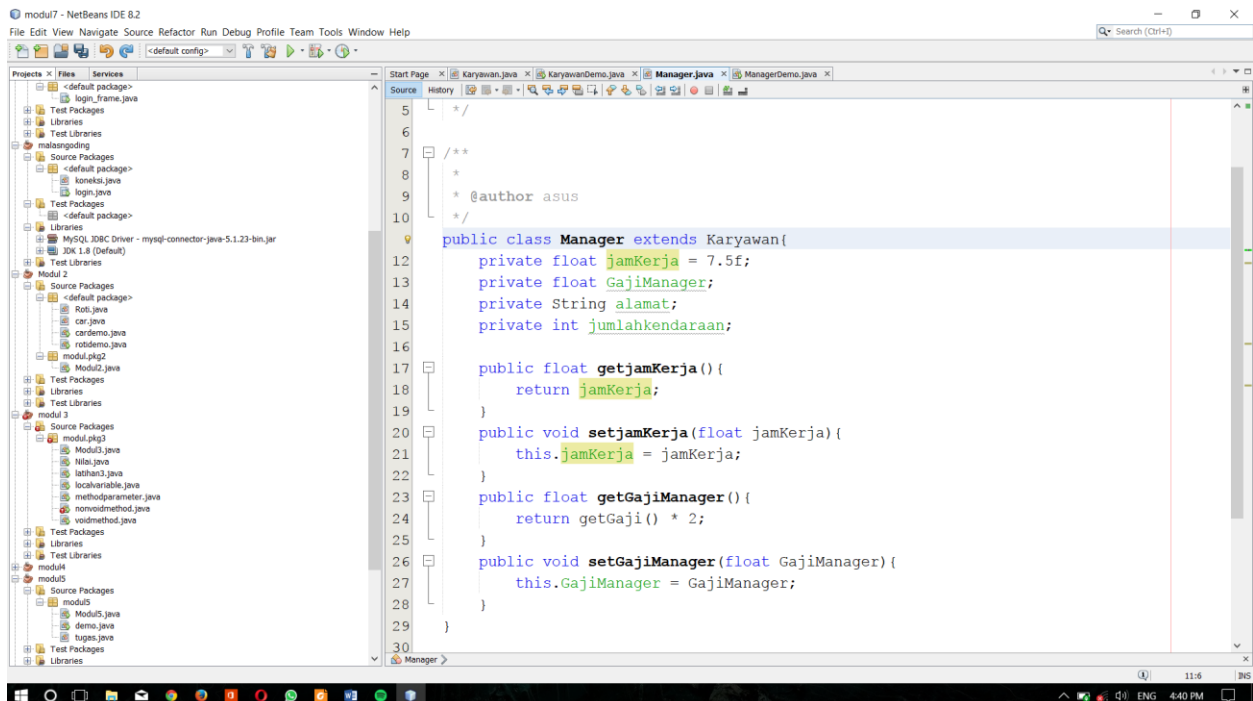

#### Class Karyawan

## Class KaryawanDemo

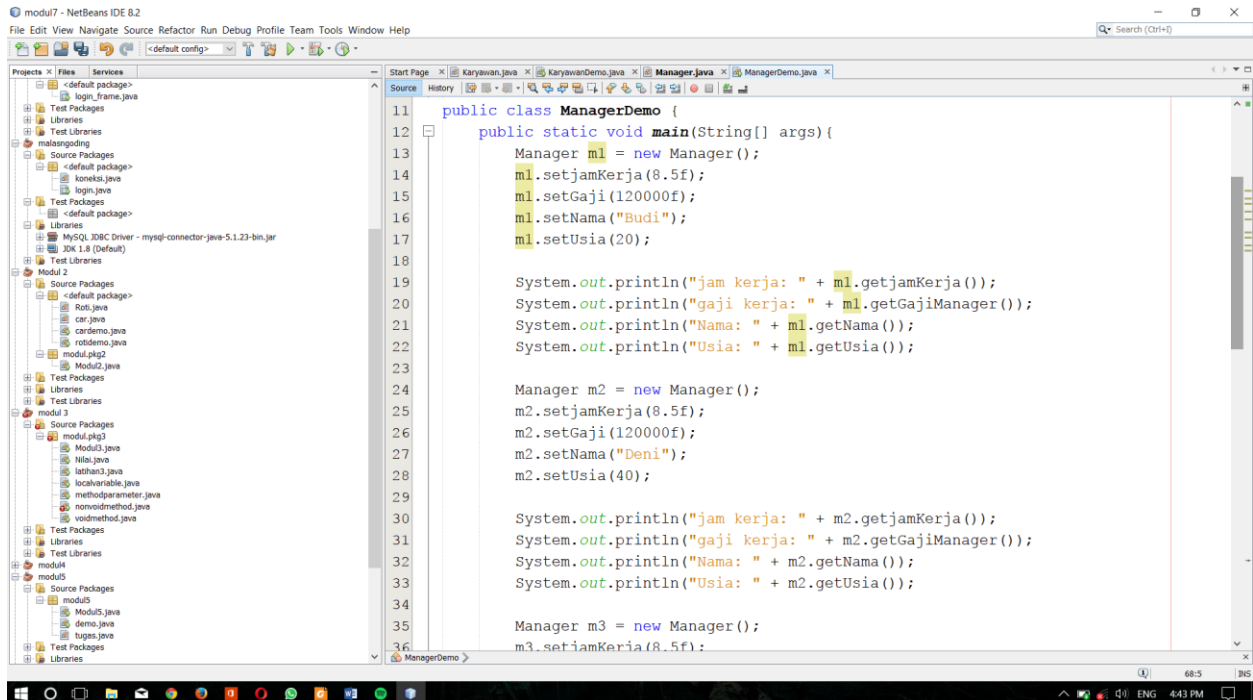

## Class Manager

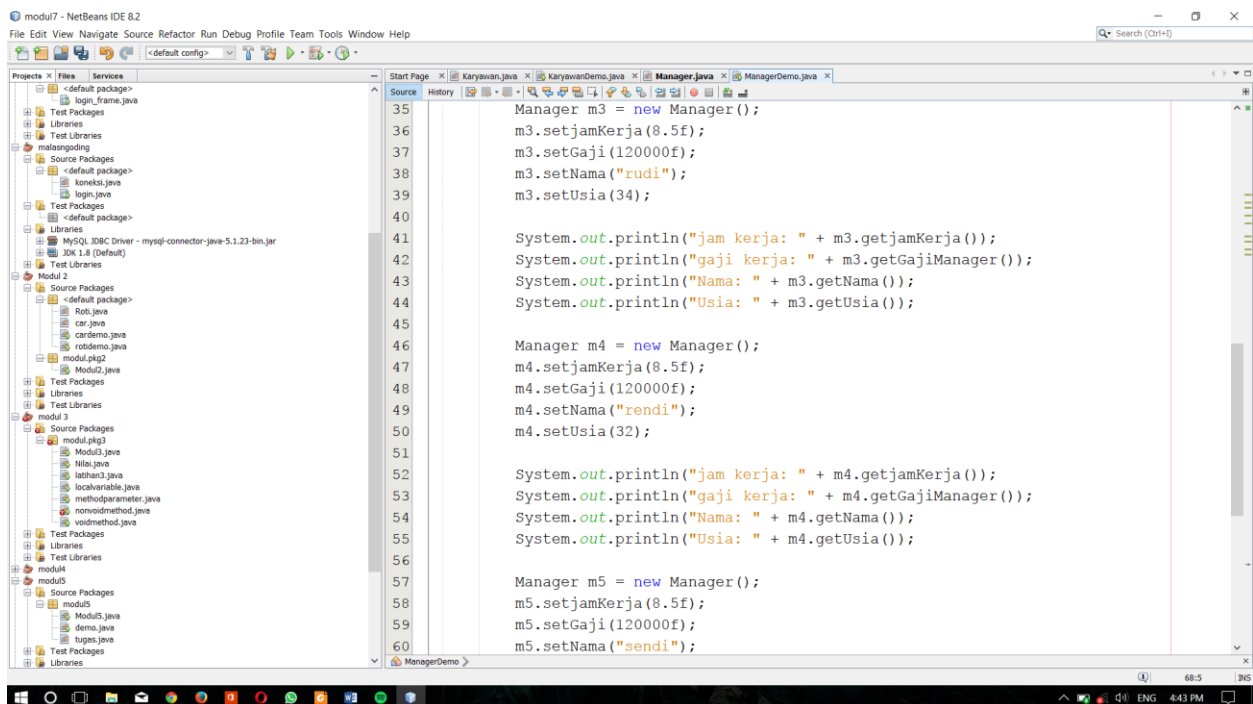

# Latihan

## 1. Membuat fungsi main dengan 5 objek

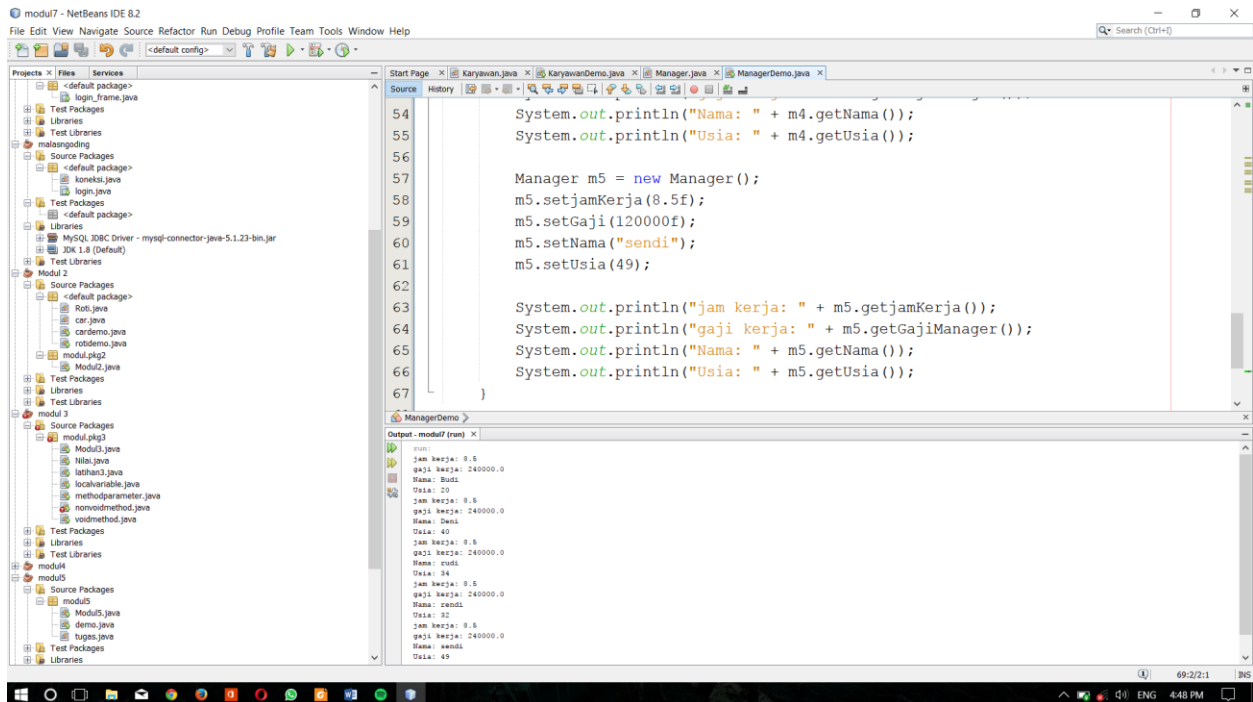

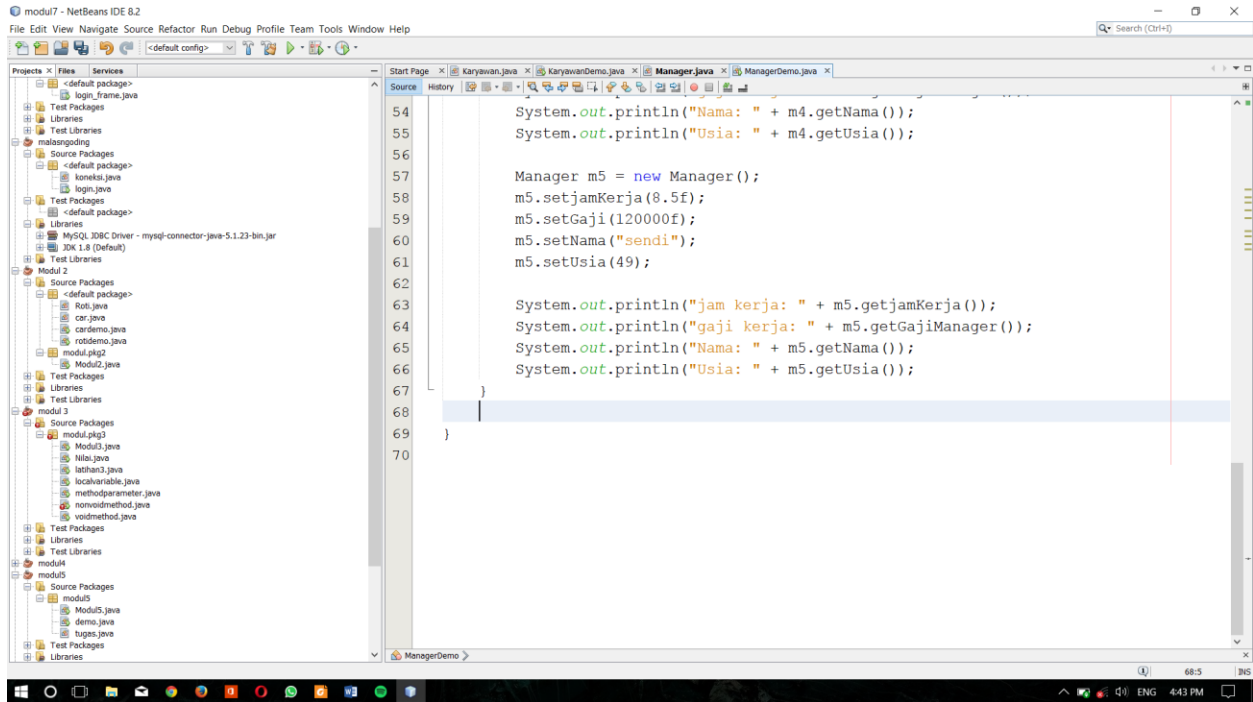

The screenshot shows the NetBeans IDE interface. The left sidebar displays the project structure with 'modul7' selected. The main editor window shows the 'ManagerDemo.java' file. The code defines a 'Manager' class and a 'main' method. The 'main' method creates five 'Manager' objects (m1 to m5) and prints their attributes. The first part of the code, from line 11 to 36, is visible.

```
11 public class ManagerDemo {
12     public static void main(String[] args) {
13         Manager m1 = new Manager();
14         m1.setjamKerja(8.5f);
15         m1.setGaji(120000f);
16         m1.setNama("Budi");
17         m1.setUsia(20);
18
19         System.out.println("jam kerja: " + m1.getjamKerja());
20         System.out.println("gaji kerja: " + m1.getGajiManager());
21         System.out.println("Nama: " + m1.getNama());
22         System.out.println("Usia: " + m1.getUsia());
23
24         Manager m2 = new Manager();
25         m2.setjamKerja(8.5f);
26         m2.setGaji(120000f);
27         m2.setNama("Deni");
28         m2.setUsia(40);
29
30         System.out.println("jam kerja: " + m2.getjamKerja());
31         System.out.println("gaji kerja: " + m2.getGajiManager());
32         System.out.println("Nama: " + m2.getNama());
33         System.out.println("Usia: " + m2.getUsia());
34
35         Manager m3 = new Manager();
36         m3.setjamKerja(8.5f);
```

The screenshot shows the NetBeans IDE interface. The left sidebar displays the project structure with 'modul7' selected. The main editor window shows the 'ManagerDemo.java' file. The code defines a 'Manager' class and a 'main' method. The second part of the code, from line 35 to 60, is visible.

```
35     Manager m3 = new Manager();
36     m3.setjamKerja(8.5f);
37     m3.setGaji(120000f);
38     m3.setNama("rudi");
39     m3.setUsia(34);
40
41     System.out.println("jam kerja: " + m3.getjamKerja());
42     System.out.println("gaji kerja: " + m3.getGajiManager());
43     System.out.println("Nama: " + m3.getNama());
44     System.out.println("Usia: " + m3.getUsia());
45
46     Manager m4 = new Manager();
47     m4.setjamKerja(8.5f);
48     m4.setGaji(120000f);
49     m4.setNama("rendi");
50     m4.setUsia(32);
51
52     System.out.println("jam kerja: " + m4.getjamKerja());
53     System.out.println("gaji kerja: " + m4.getGajiManager());
54     System.out.println("Nama: " + m4.getNama());
55     System.out.println("Usia: " + m4.getUsia());
56
57     Manager m5 = new Manager();
58     m5.setjamKerja(8.5f);
59     m5.setGaji(120000f);
60     m5.setNama("sendi");
```

## 2. Memodifikasi setter
